

STUDENT HANDOUT 3-THE LAYOUT ON TINICUM ISLAND

The Lazaretto Immigration Station, by T.L. Carnea (undated)

Courtesy of the Atwater Kent Museum of Philadelphia

- A. **Cupola or lookout point:** dome made of glass
- B. **Bargeman's House:** The bargeman transported the doctor and quarantine master to the various vessels on the water. This man stayed up all night to watch the Delaware River.
- C. **Boat house:** where the boats are kept
- D. **Delaware River**
- E. **Lazaretto Physician's House:** residence of doctor of the hospital and of inspections
- F. **Main House, Administration, or Hospital:** the building in which the sick were treated
- G. **Quarantine Landing:** 120 foot, railed platform wharf where people awaited inspections; If you look closely, you can see a bell at the river's edge, near the flagpole, which was rung upon sight of incoming ship.
- H. **Quarantine Master's House:** Inspection master
- I. **Watch House**

*According to the *Public Ledger* (Philadelphia): 1879, there was often hoisted on the "tall staff in front... the yellow Quarantine flag on which is painted a large black Q."
